Category	Resume
Data Science	Skills * Programming Languages: Python (pandas, numpy, scipy, scikit-learn, matplotlib), Sql, Java, JavaScript/JQuery. * Machine learning: Regression, SVM, Naïve Bayes, KNN, Random Forest, Decision Trees, Boosting techniques Data Science Assurance AssociateData Science Assurance Associate - Ernst & Young LLPSkill Details JAVASCRIPT- Experience - 24 months JQuery- Experience - 24 months Python- Experience - 24 monthsCompany Details company - Ernst & Young LLP description - Fraud Investigations and Dispute Services Assurance TECHNOLOGY ASSISTED REVIEW TAR (Technology Assisted Review) assists in accelerating the review process and run analytics and generate reports. * Core member of a team helped in developing automated review platform tool from scratch for assisting E discovery domain, this tool implements predictive coding and topic modelling by automating reviews, resulting in reduced time and cost. * Understand the end to end flow of the solution, doing research and development for classification models, predictive analysis and mining of the information present in text data. Worked on analyzing the outputs and precise results. * TAR assists in predictive coding, topic modelling from the evidence by following EY standards. Developed the classifier models in order to identify "red flags" and fraud-related issues. Tools & Technologies: Python, scikit-learn, tfidf, word2vec, doc2vec, cosine similarity, Naïve Bayes, LDA, NMF for topic modelling, Vader and text blob for sentiment analysis. Matplotlib lib, Tableau dashboard for reporting. MULTIPLE DATA SCIENCE AND ANALYTIC PROJECTS (USA CLIENTS) TEXT ANALYTICS - MOTOR VEHICLE CUSTOMER REVIEW DATA * Received customer feedback survey data for past one year. Performed sentiment (Positive, Negative & Neutral) and time series analysis on customer comments. * Created heat map of terms by survey category based on frequency of words * Extracted Positive and Negative words across all the Survey categories and plotted Word cloud. * Created customized tableau dashboards for effective reporting and visualizations. CHATBOT * Developed a user friendly chatbot for one of our Products which handle simple questions about hours of operation, reservation options and so on. * This chat bot serves entire product related questions. Giving overview of tool via QA platform and also give recommendation responses so that user question to build chain of relevant answer. * This tool has intelligence to build the pipeline of questions as per user requirement and asks the relevant /recommended questions. Tools & Technologies: Python, Natural language processing, NLTK, spacy, topic modelling, Sentiment analysis, Word Embedding, scikit-learn, JavaScript/JQuery, SqlServer INFORMATION GOVERNANCE Organizations to make informed decisions about all of the information they store. The integrated Information Governance portfolio synthesizes intelligence across unstructured data sources and facilitates action to ensure organizations are compliant with regulatory requirements. * Scan data from multiple sources of formats and parse different file formats, extract Meta data information, push results for indexing elastic search and created customized, interactive dashboards using kibana. * Performing ROT Analysis on the data which give information of data which helps identify content that is either Redundant, Outdated, or Trivial. * Performing full-text search analysis on elastic search with predefined methods which can tag as (PII) personally identifiable information (social security numbers, addresses, names, etc.) which frequently targeted during cyber attacks. Tools & Technologies: Python, Flask, Elastic Search, Kibana FRAUD ANALYTIC PLATFORM Fraud Analytics and investigative platform to review all red flag cases. ac FAP is a Fraud Analytics and investigative platform with inbuilt case manager and suite of Analytics for various ERP systems. * It can be used by clients to interrogate their Accounting systems for identifying the anomalies which can be indicators of fraud by running advanced analytics Tools & Technologies: HTML, JavaScript, SqlServer, JQuery, CSS, Bootstrap, Node.js, D3.js, DC.js
Data Science	Education Details May 2013 to May 2017 B.E. UIT-RGPVData ScientistData Scientist - MatelabsSkill Details Python- Experience - Less than 1 year months Statsmodels- Experience - 12 months AWS- Experience - Less than 1 year months Machine learning- Experience - Less than 1 year months Sklearn- Experience - Less than 1 year months Scipy- Experience - Less than 1 year months Keras- Experience - Less than 1 year monthsCompany Details company - Matelabs description - ML Platform for business professionals, dummies and enthusiasts. 60/A Koramangala 5th block, Achievements/Tasks behind sukh sagar, Bengaluru, India Developed and deployed auto preprocessing steps of machine learning mainly missing value treatment, outlier detection, encoding, scaling, feature selection and dimensionality reduction. Deployed automated classification and regression model. linkedin.com/in/aditya-rathore/ b4600b146 Researched and deployed the time series forecasting model ARIMA, SARIMAX, Holt-winter and Prophet. Worked on meta-feature extracting problem. github.com/rathoread Implemented a state of the art research paper on outlier detection for mixed attributes. company - Matelabs description -
Data Science	Areas of Interest Deep Learning, Control System Design, Programming in-Python, Electric Machinery, Web Development, Analytics Technical Activities q Hindustan Aeronautics Limited, Bangalore - For 4 weeks under the guidance of Mr. S. K. Srinivasan January 2019 B.Tech. Electrical and Electronics Engineering Manipal Institute of Technology January 2015 DEEKSHA CENTER January 2013 Little Flower Public School August 2000 Manipal Academy of Higher Education DATA SCIENCE AND ELECTRICAL ENTHUSIASTSkill Details Data Analysis- Experience - Less than 1 year months excel- Experience - Less than 1 year months Machine Learning- Experience - Less than 1 year months mathematics- Experience - Less than 1 year months Python- Experience - Less than 1 year months Matlab- Experience - Less than 1 year months Electrical Engineering- Experience - Less than 1 year months Sql- Experience - Less than 1 year monthsCompany Details company - THEMATHCOMPANY description - I am currently working with a Casino based operator(name not to be disclosed) in Macau.I need to segment the customers who visit their property based on the value the patrons bring into the company.Basically, I need to identify the high value customers and low value customers.

Data Science	Skills & R & Python & SAP HANA & Tableau & SAP HANA SQL & SAP HANA PAL & MS SQL & SAP Lumira & C# & Linear Programming & Data Modelling & Advance Analytics & SCM Analytics & Retail Analytics January 2017 to January 2018 PGDM Business Analytics Great Lakes Institute of Management & Illinois Institute of Technology January 2013 Bachelor of Engineering Electronics and Communication Bengaluru, Karnataka New Horizon College of Engineering, Bangalore Visvesvaraya Technological University Data Science Consultant Consultant - Deloitte RETAIL- Experience - 6 months RETAIL MARKETING- Experience - 6 months SCM- Experience - 6 months SQL- Experience - Less than 1 year months Deep Learning- Experience - Less than 1 year months Machine learning- Experience - Less than 1 year months Python- Experience - Less than 1 year months R- Experience - Less than 1 year months Company Details company - Deloitte USI description - The project involved analysing historic deals and coming with insights to optimize future deals. Role: Was given raw data, carried out end to end analysis and presented insights to client. Key Responsibilities: • Extract data from client systems across geographies. • Understand and build reports in tableau. Infer meaningful insights to optimize prices and find out process blockades. Technical Environment: R, Tableau. Industry: Cross Industry Service Area: Cross Industry - Products Project Name: Handwriting recognition Consultant: 3 months. The project involved taking handwritten images and converting them to digital text images by object detection and sentence creation. Role: I was developing sentence correction functionality. Key Responsibilities: • Gather data large enough to capture all English words • Train LSTM models on words. Technical Environment: Python. Industry: Finance Service Area: Financial Services - BI development Project Name: SWIFT Consultant: 8 months. The project was to develop an analytics infrastructure on top of SAP S/4, it would user to view financial reports to respective departments. Reporting also included forecasting expenses. Role: I was leading the offshore team. Key Responsibilities: • Design & Develop data models for reporting. • Develop ETL for data flow • Validate various reports. Technical Environment: SAP HANA, Tableau, SAP AO. Industry: Healthcare Analytics Service Area: Life Sciences - Product development Project Name: Clinical Healthcare System Consultant: 2 months. The project was to develop an analytics infrastructure on top of Argus, it would allow users to query faster and provide advance analytics capabilities. Role: I was involved from design to deploy phase, performed a lot of data restructuring and built models for insights. Key Responsibilities: • Design & Develop data models for reporting. • Develop and deploy analytical models. • Validate various reports. Technical Environment: Data Modelling, SAP HANA, Tableau, NLP. Industry: FMCG Service Area: Trade & Promotion Project Name: Consumption Based Planning for Flowers Foods Consultant: 8 months. The project involved setting up of CRM and CBP modules. Role: I was involved in key data decomposition activities and setting up the base for future year forecast. Over the course of the project I developed various models and carried out key performance improvements. Key Responsibilities: • Design & Develop HANA models for decomposition. • Develop data flow for forecast. • Developed various views for reporting of Customer/Sales/Funds. • Validate various reports in BOBJ. Technical Environment: Data Modelling, SAP HANA, BOBJ, Time Series Forecasting. Internal Initiative Industry: FMCG Customer Segmentation and RFM analysis Consultant: 3 months. The initiative involved setting up of HANA-Python interface and advance analytics on Python. Over the course I had successfully segmented data into five core segments using K-means and carried out RFM analysis in Python Technical Environment: Anaconda3, Python3.6, HANA SPS12 Industry: Telecom Invoice state detection Consultant: 1 months. The initiative was to reduce the manual effort in verifying closed and open invoices manually, it involved development to a decision tree to classify open/closed invoices. This enabled effort reduction by 60%. Technical Environment: R, SAP PAL, SAP HANA SPS12 Accenture Experience Industry: Analytics - Cross Industry In Process Analytics for SAP Senior Developer; 19 months. Accenture Solutions Pvt. Ltd., India The project involved development of SAP analytics tool - In Process Analytics (IPA). My role was to develop database objects and data models to provide operational insights to clients. Role: I have developed various Finance related KPIs and spearheaded various deployments. Introduced SAP Predictive analytics to reduce development time and reuse functionalities for KPIs and prepared production planning reports. Key Responsibilities: • Involved in information gather phase. • Designed and implemented SAP HANA data modelling using Attribute View, Analytic View, and Calculation View. • Developed various KPI's individually using complex SQL scripts in Calculation views. • Created procedures in HANA Database. • Took ownership and developed Dashboard functionality. • Involved in building data processing algorithms to be executed in R server for cluster analysis. Technical Environment: R, SAP HANA, T-SQL. Industry: Cross Industry Accenture Testing Accelerator for SAP Database Developer; 21 months. Accenture Solutions Pvt. Ltd., India Role: I have taken care of all development activities for the ATAS tool and have also completed various deployments of the product. Apart from these activities I was also actively involved in maintenance of the database servers (Production & Quality) Key Responsibilities: • Analyzing business requirements, understanding the scope, getting requirements clarified • Interacting with business and further transform all requirements to generate attribute mapping documents and reviewing mapping specification documentation • Create / Update database objects like tables, views, stored procedures, function, and packages • Monitored SQL Server Error Logs and Application Logs through SQL Server Agent • Prepared Data Flow Diagrams, Entity Relationship Diagrams using UML • Responsible for Designing, developing and Normalization of database tables • Experience in performance tuning using SQL profiler. • Involved in QA, UAT, knowledge transfer and support activities Technical Environment: SQL Server 2008/2014, Visual Studio 2010, Windows Server, Performance Monitor, SQL Server Profiler, C#, PL-SQL, T-SQL.

SAP Developer	Competencies: SAP Business Intelligence Version SAP BO 4.2 BO Tools Design Studio, IDT, Webi, UDT, CMC activities Backend DB HANA, BW, Bex Queries, SQLEducation Details SAP BO Developer and SAP HANA DeveloperSAP BO Developer - Credit SuisseSkill Details Sap Bi- Experience - 72 months CMC- Experience - 72 months HANA- Experience - 36 months BUSINESS INTELLIGENCE- Experience - 72 months SQL- Experience - 72 months SAP BO- Experience - 72 monthsCompany Details company - Accenture description - Company Accenture, Pune Environment SAP BO 4.2, IDT, HANA views Role SAP BO Developer and HANA developer Description: This Project aims to provide reporting solution for Swiss business users.The universe supports analyzing customer funds purchase order patterns and order lifecycle reporting. The purpose of reports is to provide an end-to-end view of the entire sales order transaction, and to track the investment orders in various funds, including the status of orders, order types along with the gross value and net Roles & Responsibilities:  Analyzed user requirements and sorted the best possible ways of optimizing performance of universe.  CV and generated views development in HANA studio  Handling day to day activities involved in development of Business Objects as per the client requirements.  Worked as a team member with backend counterpart to understand the Business Requirements.  Developing and maintaining universes.  Raised OSS tickets to SAP for issues and implemented suggestion/workaround in development.  Fixed webi issues reported by users.  Created BIAR file and promoted to higher environments by change request.  Project handover to team and documentation for reference. Project 2: Project Name Nestle Client Nestle Globe Company Tech Mahindra Pvt. Ltd. Bangalore Environment SAP BO 4.2, IDT, HANA views Role SAP BO Developer and HANA developer Description: This Project aims to provide reporting solution for Global business users. The Globe Integrated Order (IO), Billing Detail and Order Detail universes combines orders, deliveries, shipment and billing documents at the order item The universe supports analyzing customer order patterns and order lifecycle reporting. The purpose of reports on this universe is to provide an end-to-end view of the entire sales order transaction, and to track the sales orders in various ways, including the status of orders, order types along with the gross value Roles & Responsibilities:  Analyzed user requirements and sorted the best possible ways of optimizing performance of universe.  CV and generated views development in HANA studio  Handling day to day activities involved in development of Business Objects as per the client requirements.  Worked as a team member with backend counterpart to understand the Business Requirements.  Developing and maintaining universes.  Raised OSS tickets to SAP for issues and implemented suggestion/workaround in development.  Implemented Union pruning in concept in universe to optimize performance by partition selection in HANA views by passing value to prompt.  Fixed webi issues reported by users.  Created BIAR file and promoted to higher environments by change request.  Project handover to team and documentation for reference. Project 3: Project Name Nestle Client Nestle TCT Company Tech Mahindra Pvt. Ltd. Bangalore Environment SAP BO Xi 4.2, Design Studio 1.6 SP6 & Bex Queries Role SAP BO Developer Description: The Project was developed to show delay in Nestle freight orders by hours on cross tab, bar chart, geo map due to weather conditions. Basic Source for the data was BW Bex queries and the top of these Queries dashboard was designed. This main user audience was transport control tower members to analyze and take decision to send consignments via other modes of transport due to weather conditions to avoid delay and reduce expenditure. Roles & Responsibilities:  Involved with users to understand the Business Requirements and implement feature in a generic way.  Suggested best visualization components in dashboard to use.  Analyzing user requirements and finding the best possible ways of representing the data.  Bug Fixes and feature enhancement in application. Project 4: Project Name Nestle Client Nestle BA Company Tech Mahindra Pvt. Ltd. Bangalore Environment SAP BO 4.2, Design Studio 1.6 & Bex Queries Role SAP BO Developer Description: The Project "Nestle BA Catalogue Reporting" for Nestle is basically to provide Dashboard in Design studio with the information of all the reports used within Nestle. And this dashboard is been used by all the users of Nestle within different region of globe. Basic Source for the data was BW Bex Queries and the top of these Queries Dashboard was designed. This main purpose of the project was to help users to understand about usage of different reports on portal and to help them to take decision for decommissioning of a report. Roles & Responsibilities:  Involved with customer to understand the Business Requirements in order to present the data in a meaningful manner and suggested component selection to visualize data in most effectively.  Analyzing user requirements and finding the best possible ways of representing the data.  Changes in BW query according to requirement  Interacting with client team for requirement gathering and analysis.  Implemented ideas in bex and design studio app to optimize performance with help of successful POC. Project 5: Project Name Warner Bros Client Marvin Pictures, US Company CapGemini Pvt. Ltd. Bangalore Tools Teradata DB, SAP BO 4.1 Webi, IDT, CMC, Query builder, HPSM ticketing tool Role SAP BO Developer Description: The purpose of the project is tracking of DVD and comic sale worldwide. The Application will be used by End Users to analyze their sales Information and to help them in taking decision for their Business Growth. Sales reports in webi were based on universe. Teradata tables were source to universe. Worked as shared resource for CMC activities and webi/universe issues tickets. Roles & Responsibilities:  Working as a team member to understand the Business Requirements.  Performed CMC activities like user & user group creation, providing access to objects and folders. Created folders for reports, connection, universes and provided user security, connection pointing to universe.  Worked on issue related to connection, universe objects and webi reports enhancements.  Raised OSS messages to SAP to seek solution related to BO tool and limitations.  Worked on webi report, universe defects and enhancements.  Meeting with users to understand issue, suggest best solution and ETA.  Worked on query builder to find BO objects metadata for investigation.  Created of BIAR format using promotion management. Project 6: Project Name Nordea Client Nordea Bank, Sweden Company CapGemini Pvt. Ltd. Bangalore Environment SAP BO 4.1, IDT, Webi, Teradata Role SAP BO Developer Description: The Project report Analytics for Nordea aims to provide clear analysis of personal, company accounts in bank around the world. In all regions reports have data related to users and their account type. Webi reports based on universe based on Teradata DB financial tables. This project mainly tracks firm's Sales with respect to different criteria's like customer wise sales for different categories. It helps various end Users to analyze their sales related information and to help in their business growth Roles & Responsibilities:  Involved in activities to understand the Business Requirements.  Analyzing user requirements and finding the best possible ways of representing the data.  Designing and developing interactive webi reports as per client's dynamic requirements.  Developed webi reports having blocks, graphs and linked report with summary report.  After development performing unit test activities and presentation to users.  Implementation of Business Object i.e. Webi from one Environment to another using BIAR File.  Fixed issues in webi reports related to data and report formatting and made changes in report requested by users in MAT.  Prepared RDO for reports and performed unit testing.  Provided KT to users and supports teams.

Jr. Java Developer PROJECTS Project #1 Project SWB-EBS_Support Role Java Developer Description Inventory Operation System provides with a way to manage the inventories which are conducted on a day to day basis. It is used by account owners and district offices to manage their inventory cycles, plan their events, set Responsibilities Environment & Accounts/Customers/Stores & Cycles & Planning/Scheduling/Rescheduling/Splits & Time Collection & Invoicing & Closing the week Use of bulk updates- bulk inserts. Updates to be performed based on primary & Java 1.6, Ice faces 1.8.2, Ibatis 2.0, Jboss Seam, EJB 2.0, HTML Project #2 Project INTELLIGEN_FOR MOBILEAPP_DEV_KAUAPC Role Java Developer Description Inventory Management for a retailer project is to develop Inventory Management System (IMS), accessible on Android, for retailers to track their outstanding inventory, cost of inventory, sales by day and thus empower retailers Responsibilities & Cost of Inventory & Inventory Management System & Time Management & Machine Learning Platforms Environment & Java 1.6, Core Java 6.0, JSF 2.0, Rich Faces 4.1, Spring 3.2, Restful Web service using Jersey API Project #3 Project Loan LeLo Automation Role Software Test Engineer Description Loan Le Lo Offers for the selected loan from multiple banks. Customer can select particular loan offer and will have to fill the details in the form and will get registered. Email will be sent to his registered email id with login id and Responsibilities & Development of Page Object Model Framework for Automation Testing. & Development of Automation Test Script using Selenium WebDriver & TestNG in JAVA. & Execution of Selenium Test cases and Reporting defects. & Debugging & Executing Automation test script using Selenium Web Driver. & Involved in Functional & Regression Testing. & Worked on Jenkins for Continuous Integration Requirements. & Reviewed Test Reports and Prepared Summary Reports. Environment & Selenium Web Driver, Java, Eclipse, TestNG, SQL. Project #4 Project DDSM Automation Role Software Test Engineer Description The objective of this project is to automate a system for ZZ server. ZZ server that is Data Divider team has a manual system to enter a customer details & its user details. DDSM system have multiple roles. Each role have set Responsibilities & Responsible for Integration Testing, Functional Testing, System Testing. & Creating automation test cases for existing POM Framework using Selenium Web Driver. & Enhanced Test cases using Java programming features and TestNG Annotations. & Debugging & Executing Automation test script using Selenium Web Driver. & Followed Data driven approach: Reading the data from Excel file. & Worked on Jenkins for Continuous Integration (CI) Requirements. & Involved in Regression Testing, API Testing. & Preparation of weekly and monthly status reports. Environment & Selenium Web Driver, Java, Eclipse, HTML, TestNG, SQL, Postman

Operations Manager	Education Details August 2000 B.E Electronics Pune, Maharashtra Pune University Operations Manager Operations Manager - Delta Controls, Dubai FZCO Skill Details Company Details company - Delta Controls, Dubai FZCO description - Heading Pune Branch (M/s Deltanex Integrators Pvt. Ltd.) Designation - Operations Manager [1st Employee] From Aug '17 till date 1. Reporting to the GM-Operations 2. Review of SOW, RFQ, Assist the proposal Team on the Engineering man hours, Project Schedule, Organization Chart and Meeting the client for pre-sales support 3. Review of SOW, RFQ, Client's Purchase Order or contract terms & conditions 4. Project Execution Plans after through discussion with client & consultants 5. Kick of meet 14. Monitoring & complying with invoicing schedules. 15. Compilation and submission of Change Orders / Waivers / Concessions. Responsible for Variation claims with support of proposal team 16. Approving the MRN & follow up with procurement team 17. Planning & Co-ordinating the project to the Project Team with proper internal kick-off and provide all the information including e-mail communication. 24. Transfer the project to the customer if any and responses from Customer 26. Site visit for Sales & technical discussions 27. Co-ordinates with Accounts for Tender Bond if any 28. Submission of offers/Tenders 29. Attending the project to the Project Team with proper internal kick-off and provide all the information including e-mail communication. company - HONEYWELL AUTOMATION INDIA LTD description - since May 2015 to June 2016 at HONEYWELL, Seoul, South Korea] Roles and Responsibilities: 1. Discuss with Honeywell Korea LE / PM and Engineering Manager, understand the work forecast and communicate it to GES stake holders. 2. Understanding Project / Work pack scope and collect required design inputs from Honeywell Korea PM and LE. 3. Communicating Project / Work pack scope and sending required design inputs to GES stake holders (OM / EM) 4. Helping GES office in preparing estimation for GES scope of activities. 5. Discuss GES estimation with Honeywell Korea PM / LE. 6. Coordinate between GES and Honeywell Korea PM / LE so that estimation is agreed by both parties. 7. Helping GES in preparing JAs. 8. Coordinate with Honeywell Korea PM / PC to get purchase orders as per JA. 9. Coordinate with GES and Honeywell Korea for following activities during project execution: a. Understanding GES queries and getting them resolved by discussing with Honeywell Korea LE. b. Communicating Honeywell Korea requirements / schedules / revised design inputs / revised scope / Concerns / issues / Honeywell Korea comments / customer comments to GES. c. Understanding GES Change orders and discussing with Honeywell Korea LE / PM. d. Finalizing change orders. e. Ensure good quality of GES deliverables by doing spot quality checks. f. Ensuring that all the procedures standards are being followed at both sides. g. Ensuring smooth project execution as per agreed project schedules. h. Ensuring that Deliverables are being sent as per agreed deliverables schedule. i. Identifying possible issues in project and suggesting corrective actions to both GES & Honeywell Korea. j. Scheduling Project review meetings whenever required. k. Attending Proto type tests / demo / Design Review meetings / Pre-Inspection Meetings / Pre KOM / KOM whenever required. l. Ensuring engineer's travel for Pre-FAT / FAT / attending important meetings like KOM, Proto type tests, etc. as mutually agreed for the project. m. Arranging invitation letters / COV / Work permits, etc. for visa processing of GES engineers. n. Ensuring that progress reports are being sent regularly by GES EM. o. Ensuring that Pre-FAT / FAT is progressing smoothly. 10. Preparing and sending Monthly Progress reports to all the stake holders. 11. Arranging monthly teleconference with Honeywell Korea PMS Business Leader, Engineering Manager and GES Operations Manager to understand the progress and issues. 12. Attending Project review meetings with PM / LE / EPC whenever required. 13. Helping Honeywell Korea Sales / Proposal team in understanding GES capabilities and providing required information to them. 14. Reviewing customer RFQs and ensure that all requirements are captured in proposals or informing the requirements / comments to proposal team / Project Manager. 15. Attending estimation review meetings, TBEs, Technical clarification meetings whenever required. LTD/Skill Details Sql Dba- Experience - Less than 1 year months/Company Details company - BNY Mellon International Operations (India) PVT. LTD description - SQL Server : ! Installation, configuration of database servers using slipstream and setup all the maintenance jobs as per the standard policy on standalone as well as cluster environments with latest service packs ! Installation of SSRS, uploading of .rds and assigning correct data sources to reports, Grant necessary access to users & developers on reporting website. Aware of SSIS and designing packages as well. ! Create and manage logins, users for database applications, assigning permissions as per requests, resolving user login issues. ! Migration of all SQL server 2005/2008 servers to higher versions. ! Setup of database refresh jobs on QA, DEV and UAT environments and fixing orphaned users. ! Troubleshoot performance related issues. ! Part of multiple projects to work with developers and provide all required support for testing in QA, UAT & DEV environment. ! Lead the DR tests for database team. ! Participate in database purge and archive activities. ! Writing codes for automating database administration tasks. ! Worked on automating DR tasks to start the agent jobs on multiple servers, restore databases for log shipped databases without manual intervention for online databases post DR activities. ! Provide support to vendor databases, follow up with the vendor calls and timely escalate to next level when there is no update in predefined timeline. ! Installation and configuration of smsql on windows server. Schedule jobs for creation and deletion of clones on sql server. Maintain backups using smsql. MongoDB Server: ! Installation and configuration of MongoDB server. ! Creation of databases and collection. ! Creation new user and grant access using Ops manager. ! Monitor database servers using Ops manager. Oracle & Sybase Server ! Managing and maintaining multiple instances of Databases on Linux and windows servers. ! Monitoring daily jobs includes backups, refresh and maintenance jobs. company - Hewlett-Packard India Sales PVT. LTD. On the payroll of Softenger India PVT. LTD description - ! Installation of SQL Server on standalone as well as windows cluster environments with latest service packs ! SQL server installation using slipstream. ! Installation of reporting services ! Creating logins and users, assigning permissions as per requests. ! Security audit for all logins includes maintenance of unused and orphan user logins ! Create & Maintain daily and weekly jobs/maintenance plans includes backup, index rebuild/reorganize , update statistics and database consistency check ! Create linked servers and ensure connectivity between servers ! Monitor disk space proactively & Space management using data and log file shrinking ! Monitor blocking, deadlocks, open transactions and slow running queries during performance issues and highlight costly queries to developers. ! Configure alerts for deadlock and blocking to maintain performance ! Implementing high availability technologies like log shipping, AlwaysON, mirroring and its troubleshooting, also have knowledge on replication ! Successfully completed migration of Databases from one server to another ! Performing DR drills (Online/Offline) on quarterly basis ! Power shell scripting to monitor, restart SQL service and get Email alert for the service status. ! Maintain TNS entries for oracle client as per client requests. ! Interacting with customers for requirements ! Contacting customer to update the status of handling issues and service requests at every stage of resolution ! Managing proper escalation and notification matrix for all support levels

Database	TECHNICAL SKILL: Operating System LINUX, Windows Server 2012 R2, Windows 98, Windows 2000/ XP Tools & Utility Packages SQL* Loader, SQL*PLUS, OEM, Datapump, expdp/impdp, PLSQL Developer, Jenkins Database Administrator January 2011 M.B.A. Amravati, Maharashtra Amravati University January 2007 B.C.A. Nagpur, Maharashtra Nagpur University Oracle Database Administrator ORACLE- Experience - 48 months LINUX- Experience - 6 months ORACLE DBA- Experience - Less than 1 year months RAC- Experience - Less than 1 year months GOLDEN GATE- Experience - Less than 1 year months ASM- Experience - Less than 1 year months DATAGUARD- Experience - Less than 1 year months Company Details company - TIETO INDIA PVT. LTD description - Pune From February 2015 till present Project Profile: Oil and Gas unit of Tieto India Pvt. Ltd. is working for Environmental Components (EC) application. Tieto is the authorized service provider in EC. Energy Components is a complete end-to-end hydrocarbon accounting solution. Responsibilities: Oracle Database Administration 11g R2, 12c and 18c Supporting databases in 24x7 environments and coordinate with Application, OS, Storage and Development Teams. Test and Production environments Experience in monitoring the CPU usage, IO and memory utilization at OS level. Checking the Alert log file to analyze the ORA errors if any to raise SR with Oracle. Monitoring the log files, backups, database space usage and the use of system resources. Configuring Backup (RMAN) for database and restoring database. Installation, configuring and updating Oracle server software and related Oracle products of 11g and 12c. Oracle Server installation, client installation and configuration, PLSQL developer installation. Creating database using DBCA and manually. Creating of Oracle user and granting proper privileges to user as per request. Creating AWR, ASH and ADDM reports for database performance analysis. Handling space management and performance issues in Oracle databases. Creating remote database link. Renaming and resizing of data files in Oracle database if needed. Tablespace shrinking with regular time interval to reclaim server space. Expertise in Export and Import using data pump in Oracle database. Expertise in Configuration of Listener and Tnsnames through NETMGR and NETCA and statically also. Managing Oracle Listener and Oracle Network Files. Creating user Profiles, granting specific privileges and roles to the users in Oracle database. Maintaining tablespaces & data files, Control files, Online Redo log files in Oracle database. Worked on AWS cloud services like EC2, S3, RDS, ELB, EBS, VPC, Route53, Auto, Cloud watch, Cloud Front, IAM for installing configuring and troubleshooting on various Amazon images for server migration from physical to cloud.
Database	Technical Skills: Databases: Oracle RDBMS- 10g, 11g & 12c Technology/utilities: Data Pump, RMAN, Data guard, ASM, RAC, Golden Gate Tools: OCC, PUTTY, SQLPLUS, SQL Developer, Netbackup, SCOM, SCCM, VMware Database Administrator Database Administrator - BNY Mellon Skill Details DATABASES- Experience - 24 months ORACLE- Experience - 24 months RMAN- Experience - 24 months NETBACKUP- Experience - 24 months SCOM- Experience - 24 months Company Details company - BNY Mellon description - Databases: 600+ Team Size: 8 Duration: Jan 2017 - Till Date Clients: Over 130+ investment banking organizations who are hosted with Eagle Responsibilities: Database Management (Support and managing critical production, Pre-production, test and reporting databases in different platforms), Capacity Management Upgrades. Handling day to day database activities monitoring and incident management. Building new databases as per the requirement and prepare them for go live with the help of multiple teams. Working on scheduled activity of database patching (CPU, PSU) and installing latest patch on production, Dev and Test databases as per the suggestion from Oracle support. Database Upgrade from 11g and to 12c. Adding disks to ASM disk groups. Building DR database using Active Data guard, Make it sync with prod and resolving issues if persists Data Guard Management- Checking lagging status, removing lagging of archives, checking processes like RFS/MR Working with Oracle Support to resolve oracle errors. Schedule daily and weekly databases backup using RMAN, Troubleshooting in RMAN issues. Database cloning using RMAN. Take part in cutover to upgrade application to higher version. Strictly following ITIL process in incident management and change management. Providing weekly report of issues in team meeting also participating and suggesting service improvement plans. Database Migrations from one server to another or to different platforms RCA and impact analysis reporting during any production outage. Previous Organization: Brose India Project I: Central IT Management company - description - Responsibilities: Managing our internal databases and servers of Brose global. Providing 24x7 on-call support in the rotational shifts. Performing day-to-day database activity and Monitoring and responding DBA group Mails for all alerts, issues and ad-hoc business user requests, etc. Database creation, patching and Backup of Database in frequent cycles using Data pump/RMAN. Database refreshes using RMAN, Datapump. Recovery using copy of data / RMAN and Monitoring logs and trace for resolving issues. Creating new VM servers and prepare it for go live. Also decommissioning as per requirements. Weekly patching of windows servers using SCCM and taking actions for patching if needed Monitoring and troubleshooting of daily and weekly OS backup using Symantec Netbackup and Managing user accounts of Oracle Project II: Data Center Migration (Onsite Project) Responsibilities: Data center migration was one of activity for migration of our datacenter from one location to another. Where our all servers and databases were moved successfully. Installation of Oracle 11g on Linux platforms Worked on service requests (Incidents / Change / Request) and Creation of users, managing user privileges and Configured RMAN backup for databases and Patching of databases ACADEMIA / PERSONAL DETAILS and Bachelor of Engineering (B.E.) in Computer Science and Engineering From SGBAU Amravati University, Amravati in 2014 with CGPA of 7.21 Current Address:- Mr. Yogesh Tikhat, C/O: Raj Ahmad, Flat# G2-702, Dreams Aakruti, Kalepadal, Hadapsar, Pune - 411028 Highest Qualification BE (cse) PAN: - AOFPT5052C

Range of accomplishments are extended right from Data Tier to Middle Tier & Application Tier: - Maximized availability of applications from 99.3% to 99.8% - Raised business by presenting Proof of Concepts for 10+ cases - Delivered upgrades of various applications time to time to keep it on supported platform - Saved SLAs as per contract by means of handling P1, P2 issues effectively - Produced Capacity reports comprising all layers (Data, Middleware, Web) of various applications - Generated Work Orders as per customer need company - Tieto Software description - - - Designed databases of various applications - Planned RMAN backup and recovery, BCP strategies - Executed Business Continuity Testing for various applications - Introduced Zero Cost high availability solutions - Active-Passive Failover - Optimized performance by means of scripting automation - Established cloning procedures for all layers of various applications - Delivered Infrastructure changes, like FW Openings & LoadBalancer configuration for new applications - Eliminated downtime by troubleshoot issues for Middleware products - OIM, OAM, SOA - Contributed to build & maintain Integration Layer- SMTR, ttp, Reverse Proxy, OCM company - Tieto Software description - - - Provided database support to environments - PROD, UAT, TEST, DEV - Performed Database Refresh/Cloning from production to development and support databases - Reduced risk level by means of upgrading & patching databases time to time - Protected databases by assigning appropriate roles and privileges as per SOD - Generated & maintained Middleware schemas using RCU - Exceeded scope of work by supporting & maintaining WebLogic platform - installation, patching, troubleshooting issues - Expanded duty scope to web servers: Install & maintain- OHS, apache, tomcat company - HSBC Software description - Being part of project supporting HSBC Bank France, I achieved: - Handled incidents & service requests as Day to day database administration tasks - Delivered basic implementation services - Database installation, patching, upgrades - Performed capacity planning - managing tablespaces, compressions - Contributed in maintaining quality of databases - managing instances, indexes, re-organization, performance monitoring & tuning using AWR, ADDM reports - Maintained backups & recovery of database - logical backups (exp/imp), datapump (expdp/impdp), cold backups, hot backups, RMAN backup/restore, RMAN Duplication - Reduced efforts by automation - Valid additionalatives which includes writing shell scripts for automated housekeeping operations, scheduling backups, use crontab/at to schedule tasks - Implemented high availability solutions - Dataguard
Database	Education Details May 2011 to May 2014 Bachelor of science Information technology Mumbai, Maharashtra Mumbai universityOracle DBAOracle database administratorSkill Details Installation of Oracle on RH Linux & Windows. Creating/Managing user profiles and analyzing their privileges and tablespace quotas Backup of database Logical and Physical procedures. Recovery of database in case of dat company - Accelya kale solutions ltd description - Database Administrator working in 24*7 support environment maintaining Databases running on Oracle 11g, 12c. Database Up-gradation from Oracle 11g to Oracle 12c. Installation of Database critical patches. Taking cold and hot backups on scheduled times and monitoring backups. Importing the export dump to another database as per demands. Automating most of the daily activities through cronjobs, shell scripts or schedulers. Making Plan of Actions for Various Activities. Raising SR with Oracle Support for different severity issues. Handling the User's request and proper client interaction. Monitoring & managing database growth, tablespaces, adding ,resizing and renaming the datafiles. Restoration of database using RMAN backups for backup consistency checks. Migration of Database using export / import and RMAN backups. Configuring & managing Physical Standby database. Creating database links, Tablespaces, database directories. Managing network settings through listener.ora and Tnsnames.ora files. Restoration of data using old logical backup as per client request. Schema replication across databases through data pump tool. Taking cold and hot backups on scheduled times and monitoring backups Taking EXPDP of database, database objects and a particular schema Using SCP ticketing tool in order keeping track of client requests.À Performing Maintenance Activities such as Index Rebuilding and stats gather. Troubleshooting the Basic LevelÀ performance issuesÀ Setting up a new environmentÀ from database perspective within the requested timelines Adding/Deleting disks in ASM and monitoring the ASM diskgroups. Creating users & privileges with appropriate roles and levels of security.À Database Administrator working in 24*7 support environment maintaining Databases running on Oracle 11g, 12c. Performing database online and offline database re-organization for database enhancement.À Migrating database from Non-ASM to ASM file system. Grid up-gradation from 11g to 12c. company - Insolutions Global Ltd description - Oracle software installation(graphical/silent),Database upgrade,Patch upgrade. Maintaining around 80+ UAT DB servers, 40 production DB and 28 standby/DR DB. Managing/creating DR & standby servers, DB sync. Backup and recovery (RMAN/ Datapump). Performing activities like switchover and failover . Allocating system storage and planning future storage requirements for the database system Enrolling users and maintaining system security. Monitoring Alert log, Snap ID generation, db size, Server space, OEM reports, User validity. Controlling and monitoring user access to the database . Scheduling shell scripts or dbms_jobs using Crontab or DBMS_SCHEDULER (monitoring script, listener check, backup script, AWR reports) etc. Planning for backup and recovery of database. Managing the production database for Oracle and SQL Server and resize the space of database/Datafiles/Tablespace/Transactional Logs. Managing Temp and Undo tablespaces. Creating primary database storage structures (tablespaces) after application developers have designed an application.

Database	TECHNICAL SKILLS & SQL & Oracle v10, v11, v12 & R programming, Python, linear regression, machine learning and statistical modelling techniques(obtained certification through Edvancer Eduventures training institute) June 2012 Sadvidya Pre-University CollegeApplication Database Administrator-DBMS (Oracle)Application Database Administrator-DBMS (Oracle) - IBM India Pvt LtdSkill Details CLIENTS- Experience - 30 months MACHINE LEARNING- Experience - 30 months ORACLE- Experience - 30 months SQL- Experience - 30 months EXCELLENT COMMUNICATION SKILLS- Experience - 6 monthsCompany Details company - IBM India Pvt Ltd description - Client: Blue Cross Blue Shield MA: Massachusetts Health Insurance &c Used Oracle SQL to store and organize data. This includes capacity planning, installation, configuration, database design, migration, security, troubleshooting, backup and data recovery. &c Worked with client databases installed on Oracle v10, v11, v12 on a Linux platform. &c Proficient communication with clients across locations facilitating data elicitation. &c Handling numerous business requests and solving them diligently within the given time frame and responding quickly and effectively to production issues within SLA. &c Leading a team in co ordination with business to conduct weekly checkouts of the database servers and systems IBM Certifications Statistics 101, Applied Data Science with R, Big Data Foundations, Data Science Foundations Business Analytics Certification (Pune) Worked on Retail and Banking projects, to design a predictive business model using machine learning techniques in R programming for an efficient business and marketing strategy.
Hadoop	Education Details Hadoop DeveloperHadoop Developer - INFOSYSskill Details Company Details company - INFOSYS description - Project Description: The banking information had stored the data in different data ware house systems for each department but it becomes difficult for the organization to manage the data and to perform some a Responsibilities: &c Analyze the banking rates data set. &c Create specification document. &c Provide effort estimation. &c Develop SPARK Scala, SPARK SQL Programs using Eclipse IDE on Windows/Linux environment. &c Create KPI's test scenarios, test cases, test result document. &c Test the Scala programs in Linux Spark Standalone mode. &c setup multi cluster on AWS, deploy the Spark Scala programs &c Provided solution using Hadoop ecosystem - HDFS, MapReduce, Pig, Hive, HBase, and Zookeeper. &c Provided solution using large scale server-side systems with distributed processing algorithms. &c Created reports for the BI team using Sqoop to export data into HDFS and Hive. &c Provided solution in supporting and assisting in troubleshooting and optimization of MapReduce jobs and Pig Latin scripts. &c Deep understanding of Hadoop design principles, cluster connectivity, security and the factors that affect system performance. &c Worked on importing and exporting data from different databases like Oracle, Teradata into HDFS and Hive using Sqoop, TPT and Connect Direct. &c Import and export the data from RDBMS to HDFS/HBASE &c Wrote script and placed it in client side so that the data moved to HDFS will be stored in temporary file and then it will start loading it in hive tables. &c Developed the Sqoop scripts in order to make the interaction between Pig and MySQL Database. &c Involved in deeping the Hive Reports, Partitions of Hive tables. &c Created and maintained technical documentation for launching HADOOP Clusters and for executing HIVE queries and PIG scripts. &c Involved in running Hadoop jobs for processing millions of records of text data Environment: Java, Hadoop, HDFS, Map-Reduce, Pig, Hive, Sqoop, Flume, Oozie, HBase, Spark, Scala, Linux, NoSQL, Storm, Tomcat, Putty, SVN, GitHub, IBM WebSphere v8.5. Project #1: TELECOMMUNICATIONS Hadoop Developer Description To identify customers who are likely to churn and 360-degree view of the customer is created from different heterogeneous data sources. The data is brought into data lake (HDFS) from different sources and anal Responsibilities: &c Installed and Configured Apache Hadoop tools like Hive, Pig, HBase and Sqoop for application development and unit testing. &c Wrote MapReduce jobs to discover trends in data usage by users. &c Involved in database connection using SQOOP. &c Involved in creating Hive tables, loading data and writing hive queries Using the HiveQL. &c Involved in partitioning and joining Hive tables for Hive query optimization. &c Experienced in SQL DB Migration to HDFS. &c Used NoSQL(HBase) for faster performance, which maintains the data in the De-Normalized way for OLTP. &c The data is collected from distributed sources into Avro models. Applied transformations and standardizations and loaded into HBase for further data processing. &c Experienced in defining job flows. &c Used Oozie to orchestrate the workflow. &c Implemented Fair schedulers on the Job tracker to share the resources of the Cluster for the Map Reduce jobs given by the users. &c Exported the analyzed data to the relational databases using HIVE for visualization and to generate reports for the BI team. Environment: Hadoop, Hive, Linux, MapReduce, HDFS, Hive, Python, Pig, Sqoop, Cloudera, Shell Scripting, Java (JDK 1.6), Java 6, Oracle 10g, PL/SQL, SQL*PLUS

Hadoop	&c Operating systems:-Linux- Ubuntu, Windows 2007/08 &c Other tools:- Tableau, SVN, Beyond Compare.Education Details January 2016 Bachelors of Engineering Engineering Gujarat Technological UniversitySystems Engineer/Hadoop DeveloperSystems Engineer/Hadoop Developer - Tata Consultancy ServicesSkill Details Hadoop,Spark,Sqoop,Hive,Flume,Pig- Experience - 24 monthsCompany Details company - Tata Consultancy Services description - Roles and responsibility: Working for a American pharmaceutical company (one of the world's premier biopharmaceutical) who develops and produces medicines and vaccines for a wide range of medical disciplines, including immunology, oncology, cardiology, endocrinology, and neurology. To handle large amount of United Healthcare data big data analytics is used. Data from all possible data sources like records of all Patients(Old and New), records of medicines, Treatment Pathways & Patient Journey for Health Outcomes, Patient Finder (or Rare Disease Patient Finder), etc being gathered, stored and processed at one place. &c Worked on cluster with specs as: - o Cluster Architecture: Fully Distributed Package Used: CDH3 - o Cluster Capacity: 20 TB - o No. of Nodes: 10 Data Nodes + 3 Masters + NFS Backup For NN &c Developed proof of concepts for enterprise adoption of Hadoop. &c Used SparkAPI over Cloudera Hadoop YARN to perform analytics on the Healthcare data in Cloudera distribution. &c Responsible for cluster maintenance, adding and removing cluster nodes, cluster monitoring and trouble-shooting, manage and review data backups, and reviewing Hadoop log files. &c Imported & exported large data sets of data into HDFS and vice-versa using sqoop. &c Involved developing the Pig scripts and Hive Reports &c Worked on Hive partition and bucketing concepts and created hive external and Internal tables with Hive partition.Monitoring Hadoop scripts which take the input from HDFS and load the data into Hive. &c Developed Spark scripts by using Scala shell commands as per the requirement and worked with both Data frames/SQL/Data sets and RDD/MapReduce in Spark. Optimizing of existing algorithms in Hadoop using SparkContext, Spark-SQL, Data Frames and RDD's. &c Collaborated with infrastructure, network, database, application and BI to ensure data, quality and availability. &c Developed reports using TABLEAU and exported data to HDFS and hive using Sqoop. &c Used ORC & Parquet file formats for serialization of data, and Snappy for the compression of the data. Achievements &c Appreciation for showing articulate leadership qualities in doing work with the team. &c Completed the internal certification of TCS Certified Hadoop Developer. Ongoing Learning &c Preparing and scheduled the Cloudera Certified Spark Developer CCA 175.

Hadoop	Areas of expertise & Big Data Ecosystems: Hadoop-HDFS, MapReduce, Hive, Pig, Sqoop, HBase Oozie, Spark, Pyspark, HUE and having knowledge on cassandra & Programming Languages: Python, Core Java and have M.Tech (IT-DBS) B.Tech (CSE) SRM UniversitySoftware EngineerSoftware Engineer - Larsen and ToubroSkill Details Company Details company - Larsen and Toubro description - Worked as a Software Engineer in Technosoft Corporation, Chennai from Aug 2015 to sep 2016. company - Current Project description - Duration: September 2016 to Till date Vendor: Citi bank Description: Citibank's (Cit) Anti-Money Laundering (AML) Transaction Monitoring (TM) program is a future state solution and a rules-based system for transaction monitoring of ICG-Markets business. Roles and Responsibilities: & Building and providing domain knowledge for Anti Money Laundering among team members. & The layered architecture has Data Warehouse and Workspace layers which are used by Business Analysts. & Actively involved in designing of star-schema model involving various Dimensions and Fact tables. & Designed SCDD for maintaining history of the DIM data. & Developing Hive Queries for mapping data between different layers of architecture, and it's usage in Oozie Workflows. & Integration with Data Quality and Reconciliation Module. & Regression and Integration testing of solution for any issues in integration with other modules and effectively testing the data flow from layer-to-layer. & Transaction monitoring system development to generate Alerts for the suspicious and fraudulent transactions based on requirements provide by BAs. & Developing spark Jobs for various business rules. & Learning "Machine Learning", which will be used further in the project for developing an effective model for Fraud detection for Anti Money Laundering system. & Scheduling Jobs using Autosys tool. & Deployment and Code Management using RTC and RLM(Release Lifecycle Management) Hadoop Developer # Current Project: PRTS - RAN Environment: Hadoop 2.x, HDFS, Yarn, Hive, Sqoop, HBase, Tez, Tableau, Sqserver, Teradata Cluster Size: 96 Node Cluster. Distribution: Horton works - HDP2.3 company - Alcatel lucent description - 1X) and Ruckus Wireless Description: The scope of this project is to maintain and store the operational and parameters data collected from the multiple vendors networks by the mediation team into the OMS data store and make it available for RF engineers to be Responsibilities: & Working with Hadoop Distributed File System. & Involved in importing data from MySQL to HDFS using SQOOP. & Involved in creating Hive tables, loading with data and writing hive queries which will run on top of Tez execution Engine. & Involved in Preparing Test cases Document. & Involved in Integrating Hive and HBase to store the operational data. & Monitoring the Jobs through Oozie. company - Current Project description - Anti - Money laundering Environment: Hadoop 2.x, HDFS, Yarn, Hive, Oozie, Spark, Unix, Autosys, Python, RTC, RLM, ETL Framew work Cluster Size: 56 Node Cluster. Distribution: Cloudera 5.9.14
Hadoop	Technical Skill Set: Programming Languages Apache Hadoop, Python, shell scripting, SQL Technologies Hive, Pig, Sqoop, Flume, Oozie, Impala, hdfs Tools Dataiku, Unravel, Cloudera, Putty, HUE, Cloudera Manager, Eclipse B.E. The Data Lake program is started to provide multi-talent, secure data hub to store application's data on Hadoop platform w Responsibility 1. Developed proactive Health Check utility for Data Lake. The utility proactively checks the smooth functioning of all Hadoop components on the cluster and sends the result to email in HTML format. The utility 2. Getting the data in different formats and processing the data in Hadoop ecosystem after filtering the data using the appropriate techniques. 3. Developed data pipeline utility to ingest data from RDBMS database to Hive external tables using Sqoop commands. The utility also offers the data quality check like row count validation. 4. Developed and automated various cluster health check, usage, capacity related reports using Unix shell scripting. 5. Optimization of hive queries in order to increase the performance and minimize the Hadoop resource utilizations. 6. Creating flume agents to process the data to Hadoop ecosystem side. 7. Performed benchmark testing on the Hive Queries and Impala queries. 8. Involved in setting up the cluster and its components like edge node and HA implementation of the services: Hive Server2, Impala, and HDFS. 9. Filtering the required data from available data using different technologies like pig, regex Serde etc. 10. Dataku benchmark testing on top of Impala and Hive in compare to Greenplum database. 11. Moving the data from Greenplum database to Hadoop side with help of Sqoop pipeline, process the data to Hadoop side and storing the data into Hive tables to do the performance testing. 12. Dealing with the Hadoop ecosystem related issues in order to provide stability to WM Hadoop ecosystem. 13. Rescheduling of job from autosys job hosting to TWS job hosting for better performance. ETL Developer	TechnicalProficiencies DB: Oracle 11g Domains: Investment Banking, Advertising, Insurance. Programming Skills: SQL, PLSQL BI Tools: Informatica 9.1 OS: Windows, Unix Professional Development Trainings &c Concepts in BCA Nanded, Maharashtra Nanded UniversityETL DeveloperETL Developer - Sun Trust Bank NYSkill Details ETL- Experience - 39 months EXTRACT, TRANSFORM, AND LOAD- Experience - 39 months INFORMATICA- Experience - 39 months ORACLE- Experience - 39 months UNIX- Experience - 39 monthsCompany Details company - Sun Trust Bank NY description - Sun Trust Bank, NY JAN 2018 to present Client: Sun Trust Bank NY Environment: Informatica Power Center 9.1, Oracle 11g, unix. Role: ETL Developer Project Profile: Sun Trust Bank is a US based multinational financial services holding company, headquarters in NY that operates the Bank in New York and other financial services investments. The company is organized as a stock corporation Financial services and support to the other divisions. The objective of the first module was to create a DR system for the bank with a central point of communication and storage for Listed, Cash securities, Loans, Bonds, Notes, Equities, Rates, Commodities, and FX asset classes. Contribution / Highlights: &c Liaising closely with Project Manager, Business Analysts, Product Architects, and Requirements Modelers (CFOC) to define Technical requirements and create project documentation. &c Development using Infa 9.1, 11g/Oracle, UNIX. &c Use Informatica PowerCenter for extraction, transformation and loading (ETL) of data in the Database. &c Created and configured Sessions in Informatica workflow Manager for loading data into Data base tables from various heterogeneous database sources like Flat Files, Oracle etc. &c Unit testing and system integration testing of the developed mappings. &c Providing production Support of the deployed code. &c Providing solutions to the business for the Production issues. &c Had one to One interaction with the client throughout the project and in daily meetings. Project #2 company - Marshall Multimedia description - JUN 2016 to DEC 2017 Client: Marshall Multimedia Environment: Informatica Power Center 9.1, Oracle 11g, unix. Role: ETL Developer Project Profile: Marshall Multimedia is a US based multimedia advertisement services based organization which has head courter in New York. EGC interface systems are advert management, Customer Management, Billing and Provisioning Systems for Consumer& Enterprise Customers. The main aim of the project was to create an enterprise data warehouse which would suffice the need of reports belonging to the following categories: Financial reports, management reports and rejection reports. The professional reports were created by Cognos and ETL work was performed by Informatica. This project is to load the advert details and magazine details coming in Relational tables into data warehouse and calculate the compensation and incentive amount monthly twice as per business rules. Contribution / Highlights: &c Developed mappings using different sources by using Informatica transformations. &c Created and configured Sessions in Informatica workflow Manager for loading data into Data Mart tables from various heterogeneous database sources like Flat Files, Oracle etc. 2 &c Unit testing and system integration testing of the developed mappings. &c Providing solutions to the business for the Production issues. Project #3 company - Assurant healthcare/Insurance Miami USA description - Assurant, USA NOV 2015 to MAY 2016 Project: ACT BI - State Datamart Client: Assurant healthcare/Insurance Miami USA Environment: Informatica Power Center 9.1, Oracle 11g, unix. Role: ETL Developer Project Profile: Assurant, Inc. is a holding company with businesses that provide a diverse set of specialty, niche-market insurance products in the property, casualty, life and health insurance sectors. The company's four operating segments are Assurant Employee Benefits, Assurant Health, Assurant Solutions and Assurant Specialty Property. The project aim at building State Datamart for enterprise solution. I am part of team which is responsible for ETL Design & development along with testing. Contribution / Highlights: &c Performed small enhancement &c Daily load monitoring &c Attend to Informatica job failures by analyzing the root cause, resolving the failure using standard documented process. &c Experience in writing SQL statements. &c Strong Problem Analysis & Resolution skills and ability to work in Multi Platform Environments &c Scheduled the Informatica jobs using Informatica scheduler &c Extensively used ETL methodology for developing and supporting data extraction, transformations and loading process, in a corporate-wide-ETL Solution using Informatica. &c Involved in creating the Unit cases and uploaded in to Quality Center for Unit Testing and UTR &c Ensure that daily support tasks are done in accordance with the defined SLA.

Agnel PolytechnicETL DeveloperETL DeveloperSkill Details informatics- Exprience - 36 monthsCompany Details company - Blue Shield of California description - Duration: (Mar 2016 - Sept 2017) Description: Blue Shield of California (BSC) is health plan provider. The intent of this project is to process feeds coming in and going out of BSC system related to eligibility, enrollment, and claims subject areas. All these feeds comes in d Technical environment: ETL tool (Informatica power Center 9.6.1), Oracle 11g (SQL, PL-SQL), UNIX, Facets, Tidal, JIRA, Putty. Role: ETL Developer Responsibilities: &c Responsible for analyzing the business requirement document &c Involved in development of Informatica mappings using different transformations like source qualifier, expression, filter, router, joiner, union &c Extensively used Informatica Debugger to figure out the problems in mapping and involved in troubleshooting the existing bugs. &c Writing Unix Scripts & SQL's as per the business requirement. &c Impact analysis of change requests & their development. &c Data fabrication using Facets screens as well as SQL statements in membership domain. &c Unit testing & trouble shooting using Informatica debugger, SQL query & preparation of Unit Test Cases. &c Prepare documents for design, unit testing and impact analysis. Awards & Achievements &c Received Kudos Award at Syntel for contribution in error free work, commitment towards learning, client appreciation and outstanding display of Syntel values Received appreciation from Manager &c Received spot recognition for automation done in project.

ETL Developer	SKILL SET à Talend Big Data à Informatica Power center à Microsoft SQL Server à SQL Platform 6.2.1 Management Studio Workbench à AWS Services à Talend Administration Console à Microsoft Visual à Redshift (TAC) Studio January 2012 to January 2016 BE Mumbai, Maharashtra University of Mumbai January 2012 CBSE Technology Kochi, Kerala St. Francis Talend ETL Developer Talend ETL Developer - Tata Consultancy Services Skill Details DATA WAREHOUSE- Experience - 23 months DATABASE- Experience - 20 months INTEGRATION- Experience - 20 months MS SQL SERVER- Experience - 20 months Company Details company - Tata Consultancy Services description - Prepared ETL mapping Documents for every mapping and Data Migration document for smooth transfer of project from development to testing environment and then to production environment. Performed Unit validate data loads in the target. Troubleshoot long running jobs and fixed the issues. à Expertise in creating mappings in TALEND using Big Data supporting components such as tJDBCConfiguration, tJDBCInput, tHDFSConfiguration, tS3Configuration, tCacheOut, tCacheIn, tSqlRow and standard components like tFileInputDelimited, tFileOutputDelimited, tMap, tJoin, tReplicate, tParallelize, tConvertType, tAggregate, tSortRow, tFlowMeter, tLogCatcher, tRowGenerator, tUva, tUvarow, tAggregateRow, tFilter etc. à Used ETL methodologies and best practices to create Talend ETL jobs. Followed and enhanced programming and naming standards. Developed jobs, components and Joblets in Talend. Used tRunJob component to run child job from a parent job and to pass parameters from parent to child job. à Created and deployed physical objects including custom tables, custom views, stored procedures, and indexes to SQL server for Staging and Data-Warehouse environment. Involved in writing SQL Queries and used Joins. à Created and managed Source to Target mapping documents for all Facts and Dimension tables. Broad design, development and testing experience with Talend Integration Suite and knowledge in Performance Tuning of r à Extensively used tMap component which does lookup & Joiner Functions. Experienced in writing expressions within tmap as per the business need. Handled insert and update Strategy using tSQLRow. à Created Implicit, local and global Context variables in the job to run Talend jobs against different environments. à Worked on Talend Administration Console (TAC) for scheduling jobs and adding users. Experienced in Building a Talend job outside of a Talend studio as well as on TAC server. à Developed mappings to load Fact and Dimension tables, SCD Type 1 and SCD Type 2 dimensions and Incremental loading and unit tested the mappings. à Developed Framework Integrated Job which schedules multiple jobs at a time and updates the last successful run time, success status, sending mail for failed jobs, maintaining the counts in SQL Database. Used tParallelize component and multi thread execution option to run subjobs in parallel which increases the performance of a job. à Created Talend jobs to copy the files from one server to another and utilized Talend FTP components. Implemented FTP operations using Talend Studio to transfer files in between network folders as well as to FTP server using components like tFileList, tS3Put, tFTPput, tFileExist, tFTPConnection etc. à Extracted data from flat files/ databases applied business logic to load them in the staging database as well as flat files. à Successfully Loaded Data into different targets from various source systems like SQL Database, DB2, Flatfiles, XML files etc into the Staging table and then to the target database. company - Tata Consultancy Services description - Experience in development and design of ETL (Extract, Transform and Loading data) methodology for supporting data transformations and processing, in a corporate wide ETL Solution using TALEND Big Data Platform. à Excellent working experience in Agile methodologies. à Proficiency in gathering and understanding the client requirements and translate business needs into technical requirements. à Design and develop end-to-end ETL process from various source systems to Staging area, from staging to Data Warehouse, relating and documenting business, functional and data requirements, context/variable diagrams, use cases and ETL related diagrams. à Excellent oral/written communication with ability to effectively work with onsite and remote teams. à A good team player with excellent problem solving ability and time management skills having profound insight to determine priorities, schedule work and meet critical deadlines. company - Tata Consultancy Services description - Prepared ETL mapping Documents for every mapping and Data Migration document for smooth transfer of project from development to testing environment and then to production environment. Performed Unit validate data loads in the target. Troubleshoot long running jobs and fixed the issues.
